But what is life like for the players who compete in the KHL? How do they deal with the long travel distances, the different cultures, and the pressure to perform at the highest level?

In his new book, "Life in the KHL: Doctors, Bazas, and Millions of Air Miles," author and journalist Slava Malamud takes readers inside the world of the KHL. Malamud spent several years following the KHL, talking to players, coaches, and team officials about their lives on and off the ice.

The result is a fascinating and revealing look at one of the most unique and challenging hockey leagues in the world. Malamud's book is full of stories about the players' lives on the road, the challenges they face, and the sacrifices they make to play the game they love.

One of the most interesting things about the KHL is the way that teams travel. With teams spread out across a vast geographic area, travel can be a major challenge. Some teams spend more than 100 days on the road each season.

To cope with the long travel distances, KHL teams have developed a unique system of "bazas." Bazas are essentially training and living facilities that teams use when they are on the road. Bazas are typically located in small towns or cities, and they provide teams with a place to stay, train, and eat.

Bazas can be a lifesaver for players, especially during long road trips. They provide a place for players to relax and recover from games, and they also help to create a sense of community among the team.

Of course, life in the KHL is not all about travel. Players also have to deal with the pressure to perform at the highest level. The KHL is one of the most competitive hockey leagues in the world, and players are expected to perform at their best every night.

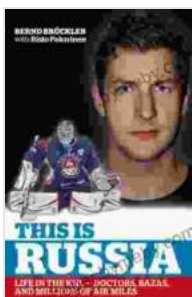

The pressure to perform can be immense, and it can take a toll on players both physically and mentally. In his book, Malamud talks to players about how they deal with the pressure and how they stay motivated.

"Life in the KHL" is a fascinating and revealing look at one of the most unique and challenging hockey leagues in the world. Malamud's book is full of stories about the players' lives on and off the ice, and it provides a unique insight into the world of professional hockey.

If you are a fan of hockey, then you will love "Life in the KHL." It is a must-read for anyone who wants to learn more about one of the most exciting and competitive hockey leagues in the world.
